## Additional Terms and Conditions

---

1. The cost of labor for two inspection is covered, excluding the labor costs for replacement of a compressor or heat pump reversing valve or labor for additional repair work not considered to be inspection. The cost of parts is not covered. Any repairs required will be brought to the attention of the owner before repairs are made. Every effort will be made to check systems for potential problems, but Dayco Heating, Air and Electrical is not responsible for any labor or parts should there be a malfunction in the system after inspection. Priority scheduling will be given.
  2. This agreement includes inspection of all control wiring between indoor and outdoor units and the thermostat, and power wiring and controls with the units. NOT included are external power wiring, circuit breakers and disconnects supplying electrical service for the units.
  3. This agreement provides for inspection of all functional components of the heating and air conditioning system, but does not include ductwork, structural supports or other sheet metal components.
  4. Should ownership of the residence where the covered equipment is located change, this contract may be transferred to the new owner, upon notification in writing to Dayco Heating, Air & Electrical. Agreement automatically renewed until given written notification to Dayco Heating, Air & Electrical.
  5. Special consideration has been given in pricing cost of this contract taking into account two maintenances per year for residential.
  6. The fulfillment is good for one year and will be automatically renewed unless otherwise cancelled after the first year by the customer on signed agreement.
  7. If program is cancelled prior to 12 months all discounts given must be paid back to Dayco Heating, Air & Electrical.

### EVAPORATOR COIL/BLOWER SECTION

Clean or Replace Air Filters (filter not included)  
Clean Evaporator Coil  
Inspect Blower Shaft and/or Motor Bearing  
Lubricate Blower and/or Motor Bearing If Required  
Tighten belt Condition and Tension  
Test Blower Condition and Rotation  
Test Motor Amp Draw

### ELECTRIC HEAT

Test Sequencer/Contactor Condition and Operation  
Test Amp Draw of Heating Elements  
Test Fuse Link and Thermo-O-Disk Condition  
Test Fan/Limit Control

### GAS HEAT

Monitor Combustion Chamber Condition  
Inspect for Leaks  
Test Ignition and Start Up  
Test Fire Control Relays and Safety Switch  
Test Burner and Flame Operation  
Monitor Draft Diverter setting and Draft over Fire  
Monitor Air Control Setting (Combustion Air)  
Test Induced Draft Blower

### CONDENSER/REFRIGERANT CIRCUIT

Clean Condenser coil  
Do Visual Inspection for Oil and Refrigerant Leaks  
Monitor Operation of Refrigerant Controls  
Run Test of Reversing Valve Operation  
Inspect Fan and Motor Bearing  
Lubricate Fan and Motor bearings, If Required  
Test Fan Motor Amp Draw  
Test Compressor Amp Draw  
Check Noise and Vibration

### SYSTEM CONTROLS

Test Thermostat Condition and Anticipator Setting  
Test Contractor Condition  
Test Defrost Cycle and Controls  
Check Outdoor Thermostat Settings  
Monitor High and Low Cutout  
Monitor All Equipment Electrical Connections

### EXTRAS

Clean Electronic Air Cleaner  
Clean Humidifier
